TECHNICAL SKILL:

Professional skills:

- UI/UX designer
- Website designer
- Android studio
- Blender
- Full stack web developer

Personal skills:

- Perseverance
- Problem solving

PROJECTS:

Medicine reminder app:

An Android Studio-created medicine reminder app offering intuitive scheduling and notifications, ensuring timely medication adherence for users' health management.

Personal portfolio website:

Created using HTML, CSS, and JavaScript, my portfolio site presents my skills and projects in a visually appealing and user-friendly format. It includes responsive design for optimal viewing across devices, showcasing my background, skills, and project gallery effectively.

Pizza shop website:

I created a website for Pizza Hunter, a fictional pizza place. This project helped me apply my design and development skills, learning the basics of web development.

Personal portfolio UI/UX design:

In this project, I designed a UI/UX prototype for my personal portfolio website using Figma. My aim was to craft a visually appealing and user-friendly interface that effectively showcases my design work and skills.
